Introduction

Project Overview

The Premium Legal Services Frontend Theme is a complete, production-ready website solution built for law firms and legal consultancies. It delivers a polished, professional web presence across public-facing pages, authenticated user areas, and administrative dashboards.

◆ Purpose

Provide a high-fidelity, responsive frontend for legal service providers seeking a premium digital presence without framework dependencies.

◆ Objectives

Deliver cross-browser compatibility, sub-second load times, full WCAG accessibility compliance, and a consistent design language across all pages.

Target Users

User Type	Access Level	Primary Pages
Prospective Client	Public	Home, About, Practice Areas, Attorneys, Contact
Registered Client	Authenticated	Client Dashboard, Profile, Documents, Messages
Administrator	Admin Role	Admin Dashboard, Client Management, Reports, Settings
General Visitor	Public	404 Error Page, Login, Signup

Business Goal

The theme targets conversion-oriented legal firms that require a sophisticated web presence capable of handling client intake, case tracking, document management, and real-time communication — all within a unified visual framework.

Scope: This documentation covers the frontend layer only. Backend integration, CMS connectivity, and database architecture are outside the current scope.

Technology Stack

Technology	Version	Purpose
HTML5	Living Standard	Semantic markup, accessibility attributes, structured document outline
CSS3	Level 3	Layout systems, custom properties, animations, responsive design
Vanilla JavaScript	ES6+	DOM manipulation, event handling, form validation, UI state management
Font Awesome	6.x	Icon library for UI elements and decorative icons
Google Fonts	—	Cormorant Garamond (headings) and Inter (body text)

Development Approach

◆ **Component-Based Architecture**

Each page is composed of modular, reusable UI components defined in shared CSS and JS files. Components follow a BEM-inspired naming convention.

◆ **Zero Framework Dependency**

No external frameworks or build tools required. The theme runs on native browser capabilities, ensuring fast load times and minimal overhead.

Reusable Components

Component	File	Usage
Navigation Header	shared.css / shared.js	All public pages
Mobile Drawer	shared.css / shared.js	All pages (responsive)
Footer	shared.css / shared.js	All public pages
Newsletter Form	shared.js	Footer, Practice Areas
Back-to-Top Button	shared.js	All pages
Scroll Animations	shared.js	All pages (on-scroll reveal)
Auth Card Layout	auth.css / auth.js	Login, Signup

Project Folder Structure

Path	Type	Description
Stackly Legal Services/	Root	Project root directory containing all HTML entry points
assets/	Folder	Static assets — logo and image files
assets/images/	Folder	Page-specific images (hero, sections, backgrounds) in WebP format
assets/images/persons/	Folder	Team member and testimonial portrait photos
css/	Folder	Stylesheets — one shared base file plus per-page stylesheets
js/	Folder	Scripts — one shared base file plus per-page scripts

File Inventory

HTML Pages (10)

File	Page
index.html	Homepage
about.html	About Us
practice-areas.html	Practice Areas
attorneys.html	Attorneys
contact.html	Contact
login.html	Login
signup.html	Signup
client-dashboard.html	Client Dashboard
admin-dashboard.html	Admin Dashboard
404.html	Error Page

CSS Files (10)

File	Scope
shared.css	Global design system
home.css	Homepage
about.css	About page
practice-areas.css	Practice Areas
attorneys.css	Attorneys page
contact.css	Contact page
auth.css	Login & Signup
admin-dashboard.css	Admin Dashboard
client-dashboard.css	Client Dashboard
404.css	Error page

JavaScript Files (10)

File	Scope	Key Responsibilities
shared.js	Global	Header, drawer, footer, newsletter, scroll animations, back-to-top
home.js	Homepage	Hero slider, testimonial carousel, stats counter
about.js	About	Journey timeline animation, FAQ accordion
practice-areas.js	Practice Areas	Tab navigation, testimonial slider, FAQ accordion
attorneys.js	Attorneys	Testimonial carousel, filter interactions
contact.js	Contact	Form validation, submission handling, success message
auth.js	Login/Signup	Form validation, password toggle, role selection
admin-dashboard.js	Admin	Sidebar toggle, profile dropdown, charts, theme switcher
client-dashboard.js	Client	Sidebar toggle, profile dropdown, calendar, chat simulation
404.js	Error	Go-back navigation, redirect timer

Design System

Brand Colors

Token	Hex	Usage
Primary	#0F172A	Backgrounds, headings, primary text, dark sections
Secondary	#C8A96B	Gold accents, buttons, highlights, icons, links
Accent	#8B6F3D	Hover states, secondary buttons, depth accents
Background	#F8FAFC	Page backgrounds, light sections
Card	#FFFFFF	Cards, modals, elevated surfaces

Typography

Role	Font Family	Weight	Size Range
Display / H1	Cormorant Garamond	700	clamp(2rem, 5vw, 4.4rem)
Section / H2	Cormorant Garamond	600	clamp(1.8rem, 4vw, 3.2rem)
Subsection / H3	Inter	600	1.1rem – 1.25rem
Body	Inter	400	0.9rem – 1.05rem
Caption / Label	Inter	600	0.72rem – 0.8rem

Spacing & Layout

Token	Value	Application
--section-padding	100px 0	Top-level section vertical spacing
--container-width	1240px	Max content width
--radius-sm	8px	Small elements (tags, badges)
--radius-md	12px	Cards, inputs, medium elements
--radius-lg	16px	Large cards, modals
--radius-full	9999px	Pills, buttons, avatars

Buttons

Variant	Background	Text	Usage
Primary	#C8A96B	#0F172A	CTAs, form submissions, key actions
Secondary	Transparent	#C8A96B	Secondary actions, outline buttons
Dark	#0F172A	#FFFFFF	Footer CTAs, dark sections

Shadow Styles

Token	Value	Usage
--shadow-card	0 4px 24px rgba(0,0,0,0.06)	Default card elevation
--shadow-elevated	0 12px 40px rgba(0,0,0,0.12)	Hover states, dropdowns, modals

Homepage

Purpose

The homepage serves as the primary entry point, establishing brand credibility and guiding visitors toward consultation or service exploration.

Sections

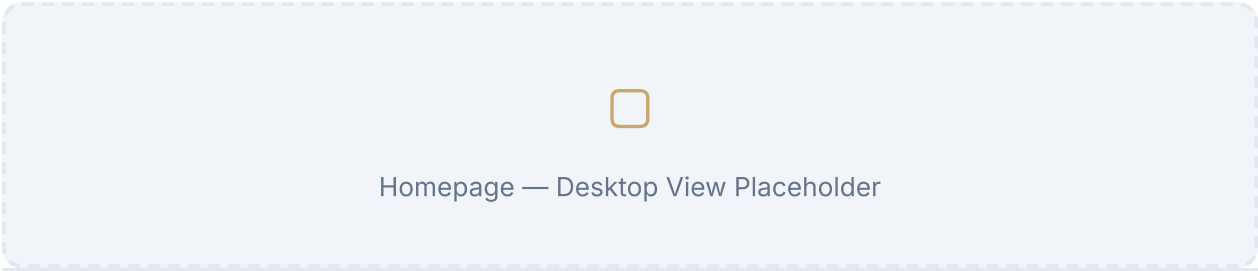

Section	Description
Hero	Full-viewport hero with background image, headline, subtitle, and dual CTA buttons
Stats Bar	Animated counters displaying key firm metrics (years, clients, attorneys, success rate)
Practice Areas Preview	Grid of practice area cards with icons and brief descriptions
About Teaser	Split-layout section with image and firm overview text
Attorneys Preview	Team member cards with photos, names, and specializations
Testimonials	Client testimonial carousel with quotes and avatars
CTA Section	Full-width call-to-action with background image and consultation prompt
FAQ	Accordion-style frequently asked questions
Newsletter	Email subscription form in footer area

Key Features

◆ Hero Slider Auto-rotating background images with fade transitions and manual navigation controls.	◆ Animated Counters Number counters animate from zero when scrolled into view, using Intersection Observer.
◆ Scroll Reveal Sections fade in on scroll with configurable delay and easing via CSS transitions.	◆ Responsive Grid 4-column desktop layout collapses to 2 columns on tablet and 1 column on mobile.

Responsive Behaviour

At 1100px, the navigation collapses into a hamburger-triggered slide-out drawer. Hero text scales proportionally. Stats grid shifts from 4-column to 2-column at 768px. Footer columns stack vertically below 768px.

About Page

Purpose

The about page communicates the firm's history, values, team expertise, and community involvement to build trust with potential clients.

Sections

Section	Description
Hero	Full-width hero with firm image, headline, and breadcrumb navigation
Our Story	Split layout with narrative text and image, plus key milestones timeline
Who We Are	Core values with icon cards — Excellence, Integrity, Innovation
Stats	Animated counter section with firm achievements
Our Journey	Vertical alternating timeline with golden line animation on scroll
Awards	Achievement cards with icons and descriptions
Community	CSR initiatives and community involvement highlights
FAQ	Accordion with firm-related questions
Newsletter	Email subscription form

Key Features

◆ **Journey Timeline**

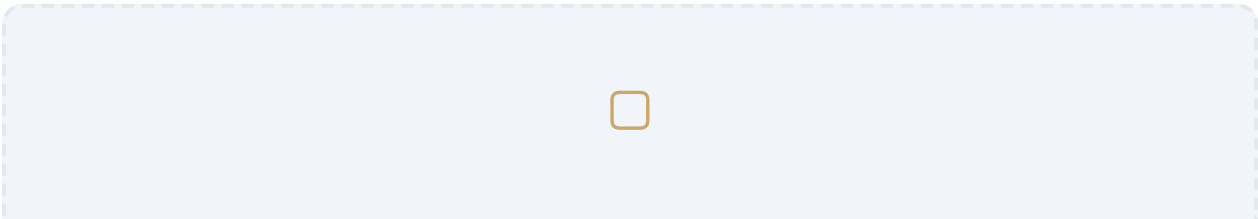

Vertical timeline with alternating left-right cards and an animated golden line that fills on scroll.

◆ **Milestones Track**

Horizontal milestone bar with dot markers and year labels, transitioning to a grid layout on mobile.

Responsive Behaviour

At 1100px, the vertical timeline collapses to a single-column left-aligned layout. The milestones track switches from horizontal line to wrapping cards. Hero height reduces progressively at 992px, 768px, and 600px breakpoints.

Practice Areas Page

Purpose

Showcases the firm's legal specializations with detailed descriptions, statistics, and industry coverage to demonstrate comprehensive legal capability.

Sections

Section	Description
Hero	Split layout with animated images on the right side — floating, pulsing, and sliding effects
Overview	Statistics and firm capability summary with animated counters
Our Expertise	8 practice area cards in a 4-column grid with icons, tags, and Read More links
Industries	Industry-specific legal service cards with icons
Why Choose Us	Feature cards highlighting firm advantages
Testimonials	Client testimonial carousel with navigation dots
FAQ	Accordion-style practice area questions
CTA	Full-width consultation call-to-action
Newsletter	Email subscription form

Key Features

◆ **Animated Hero Images**

Three unique CSS animations — float, pulse, and slide — applied to right-side images with hover scale effects.

◆ **Flex-Aligned Cards**

Practice area cards use flexbox column layout with margin-top auto on Read More links for consistent bottom alignment.

Responsive Behaviour

Hero switches to vertical stack at 1100px. Expertise grid drops to 2 columns at 1280px and 1 column at 768px. Testimonial carousel becomes vertically stacked on mobile. FAQ sections maintain accordion functionality at all breakpoints.

Practice Areas — Desktop View Placeholder

Attorneys Page

Purpose

Introduces the firm's legal team with professional profiles, specializations, and direct contact options to build client confidence.

Sections

Section	Description
Hero	Full-width hero with team image background and headline
Team Grid	Attorney cards in a responsive grid with photos, names, roles, and specializations
Attorney Profile	Each card includes education, bar admissions, and contact links
Testimonials	Client testimonial carousel with prev/next navigation
CTA	Consultation call-to-action section
Newsletter	Email subscription form

Key Features

◆ **Team Cards**

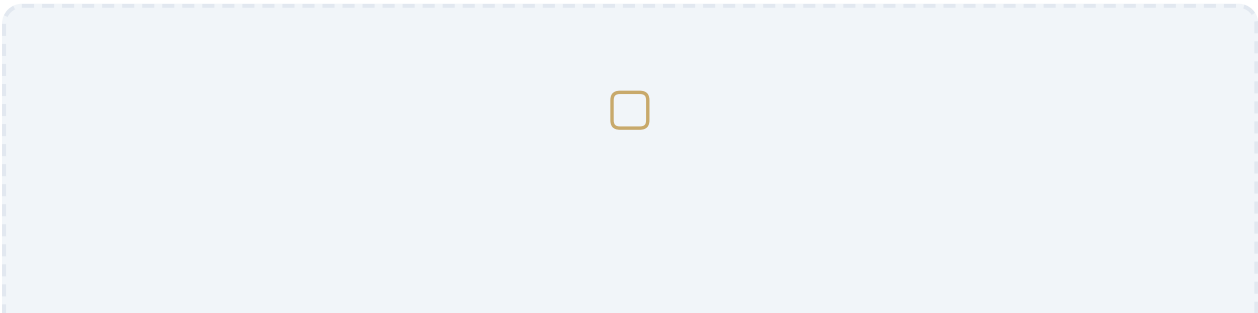

Each attorney card displays a portrait photo, name, role, specialization tags, and social/contact links with hover reveal effects.

◆ **Testimonial Carousel**

Auto-rotating testimonial slider with dot indicators and arrow navigation, pausing on hover.

Responsive Behaviour

Team grid shifts from 4 columns (desktop) to 3 columns at 1024px, 2 columns at 768px, and 1 column at 480px. Attorney card details collapse into a compact layout on mobile. Testimonial navigation arrows are hidden on screens below 600px.

Contact Page

Purpose

Provides multiple contact channels including a validated consultation form, office locations, and direct communication options.

Sections

Section	Description
Hero	Full-width hero with office image background
Contact Info	Office locations, phone numbers, email addresses, and working hours
Consultation Form	7-field form with validation — name, email, phone, practice area, contact method, message, privacy consent
Map Placeholder	Office location map embed area
FAQ	Contact-specific frequently asked questions
Newsletter	Email subscription form

Form Validation

Field	Validation Rule	Error Message
Full Name	Letters only, min 2 chars	Please enter a valid name (letters only)
Email	Valid email format regex	Please enter a valid email address
Phone	Digits only, 7–20 chars	Please enter a valid phone number
Practice Area	Required selection	Please select a practice area
Contact Method	Required selection	Please select a preferred contact method
Message	Min 10 characters	Message must be at least 10 characters
Privacy	Checkbox checked	You must consent to the privacy policy

Responsive Behaviour

Contact grid switches from 2-column to single-column at 1100px. Form fields stack vertically. Office info cards reflow into a single column at 768px. Map placeholder maintains aspect ratio at all breakpoints.

Contact Page — Desktop View Placeholder

Authentication

Login

Split-screen layout with a branded left panel (firm info, trust indicators, stats) and a right-aligned login form. Fields include email, password with show/hide toggle, remember me checkbox, and forgot password link.

Signup

Extended split-screen with role selection (Client / Administrator), full name, email, phone, password with strength meter, confirm password, and terms consent. Left panel includes "Why Choose Stackly" features and a client testimonial.

Validation

Feature	Login	Signup
Email format	Yes	Yes
Password strength	—	Real-time strength meter with requirements
Name validation	—	Letters only, min 2 chars
Phone validation	—	Digits only, 7–20 chars
Password match	—	Confirm password must match
Terms consent	—	Required checkbox
Real-time feedback	On blur	On blur + input

Password Toggle

Both login and signup forms include a show/hide password toggle button that switches the input type between "password" and "text" with an eye icon change.

Role Selection

Signup includes a 2-column role selector with "Client" and "Administrator" cards. Each card has a distinct icon and description. The selected role is visually highlighted with a gold border.

Redirections

Successful login redirects to the corresponding dashboard based on role selection. Signup success displays a confirmation message. The "Back to Home" link redirects to index.html.

Responsive Behaviour

At 1100px, the split-screen collapses to a vertical stack with the left panel as a compact banner (max 320px). Logo size is reduced at 600px and 320px. Role selector switches to single column at 390px.

Dashboards

Client Dashboard

Feature	Description
Sidebar Navigation	Collapsible sidebar with profile card, navigation links, and collapse toggle
Stats Cards	Active cases, pending tasks, upcoming appointments, unread messages
Quick Actions	Book appointment, upload document, send message, view invoices
Case Table	Sortable table with case names, types, dates, status badges, and view actions
Calendar	Monthly calendar with appointment indicators and navigation
Documents	Document cards with file type icons, names, sizes, status badges, download and view actions
Messages	Chat interface with conversation list, message thread, and input area
Invoices	Invoice cards with amounts, dates, status, pay and download buttons
Settings	Personal info, company info, and password change forms

Administrator Dashboard

Feature	Description
KPI Cards	Revenue, active clients, open cases, pending tasks with trend indicators
Quick Actions	New client, new case, schedule, upload doc, invoice, reports
Client Management	Client table with avatars, emails, status badges, assigned attorneys, view/edit actions
Case Management	Case table with client names, types, status, dates, and actions
Appointments	Appointment cards with charts and pending request approval/reschedule/cancel
Documents	Document cards with preview, download, verify, and reject actions
Payments	Revenue KPIs, invoice table, create invoice action

Feature	Description
Reports	Chart cards with weekly/monthly/yearly toggle
Tasks	Task list with add, complete, and delete functionality
Settings	Personal info, company info, password, theme switcher, backup/export

Shared Features

◆ **Profile Dropdown**

Avatar icon and chevron visible at all breakpoints. Dropdown with profile, settings, and logout options.

◆ **Theme Switcher**

Admin dashboard includes a theme toggle between default, dark, and blue color schemes.

Responsive Design

Both dashboards use a collapsible sidebar pattern. At 1024px, the sidebar slides out as an overlay. Header elements (search, notifications, profile name) progressively hide at smaller breakpoints. Tables become horizontally scrollable on mobile.

404 Page

Purpose

Displays a user-friendly error page when a requested URL does not match any existing route, preventing dead-end experiences.

Features

Element	Description
Error Code	Prominent "404" display with large typography
Headline	"Page Not Found" heading with clear messaging
Description	Brief explanation of the error and suggested next steps
Go Back Button	Navigates to the previously visited page using browser history
Home Button	Direct link to the homepage (index.html)
Background	Subtle gradient background consistent with the brand palette

Navigation

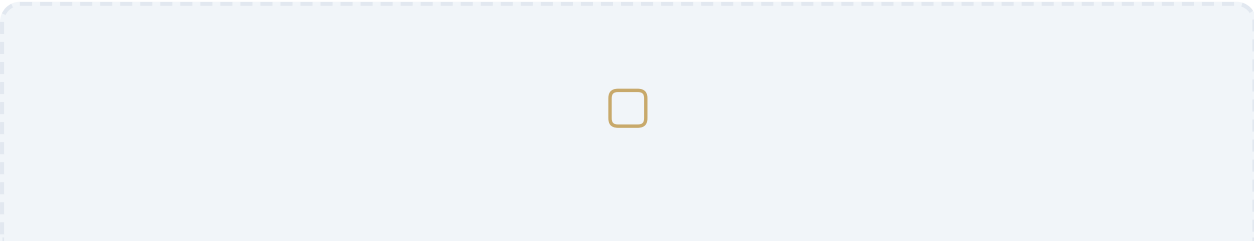

Two primary navigation paths are provided: a "Go Back" button that uses `window.history.back()` and a "Home" button that links directly to `index.html`. Both buttons are styled as prominent CTAs.

User Experience

The page maintains the site's visual language with consistent fonts, colors, and spacing. The error message is concise and actionable. The layout is centered both vertically and horizontally for immediate visibility. On mobile, buttons stack vertically for easier thumb interaction.

Responsive Behaviour

The 404 page uses a flexible center-aligned layout that adapts to all screen sizes. Font sizes scale down proportionally at smaller breakpoints. Button widths expand to full-width on mobile for easier tap targets.

Deployment

Deployment Platform

The project is hosted on **GitHub** and can be deployed via GitHub Pages or any static file hosting service.

Repository Structure

Branch	Purpose	Status
main	Production-ready code	Stable
develop	Active development branch	Development

How to Run

Clone the Repository

```
git clone https://github.com/stackly-legal/services-theme.git
```

Open Locally

```
cd services-theme  
open index.html
```

No build step, no package manager, no compilation required. Open `index.html` directly in any modern browser.

Deploy to GitHub Pages

1. Push the repository to GitHub
2. Navigate to Repository → Settings → Pages
3. Select the `main` branch and root directory
4. Click Save — the site deploys automatically

Prerequisites

Requirement	Details
Web Server	Any static file server or direct file access
Browser	Chrome 90+, Firefox 88+, Safari 14+, Edge 90+

Requirement	Details
Internet Connection	Required for Google Fonts and Font Awesome CDN

Note: For local development with hot reload, use any static server such as VS Code Live Server, Python's `http.server`, or Node's `http-server`.

Responsive Design

Breakpoints

Breakpoint	Target Device	Layout Changes
1920px	Ultra-wide displays	Increased gaps, larger typography scale
1600px	Large desktops	Container width adjustment
1440px	Standard desktops	Baseline desktop layout
1366px	Laptop screens	Minor spacing adjustments
1280px	Small laptops	Grid column reduction (4→2 for cards)
1100px	Tablet landscape	Hamburger menu activates, sidebar collapses, layouts stack vertically
1024px	Tablet portrait	Further grid reduction, sidebar overlay mode
992px	Large phones	Font size reduction, padding tightens
900px	Medium tablets	Profile names hidden, single-column sections
768px	Tablets	Single-column grids, reduced hero heights
600px	Small tablets	Compact padding, reduced icon sizes
480px	Large phones	Badge hidden, full-width buttons, minimal spacing
430px	Standard phones	Further font reduction, chevron hidden
390px	Small phones	Role grid single column, compact cards
375px	iPhone SE	Minimal padding, reduced font sizes
360px	Budget phones	Compact everything
320px	Minimum support	Smallest safe layout, all elements functional

Key Principles

◆ Zero Horizontal Scroll

All layouts prevent horizontal overflow at every breakpoint. Content reflows

◆ Fluid Layout

CSS Grid and Flexbox create fluid, proportional layouts that adapt to any

gracefully without clipping.

viewport without fixed breakpoints.

◆ Mobile-First Optimization

Critical content loads first. Progressive enhancement adds complexity at larger viewports.

◆ Touch Targets

All interactive elements maintain minimum 44px touch targets on mobile devices for accessibility compliance.

Accessibility

- Semantic HTML5 elements (header, nav, main, section, footer)
- ARIA labels on all interactive elements and landmarks
- role attributes on custom components (menus, carousels, tabs)
- Keyboard navigation support with visible focus indicators
- Color contrast ratios meeting WCAG 2.1 AA standards
- prefers-reduced-motion media query respected for animations

Browser Compatibility

Browser	Version	Status
Google Chrome	90+	Fully Supported
Mozilla Firefox	88+	Fully Supported
Apple Safari	14+	Fully Supported
Microsoft Edge	90+	Fully Supported
Samsung Internet	15+	Fully Supported

Conclusion

Project Summary

The Premium Legal Services Frontend Theme delivers a complete, production-ready web solution for law firms and legal consultancies. The theme covers 10 distinct pages spanning public marketing pages, authenticated user areas, and administrative dashboards — all built with vanilla HTML, CSS, and JavaScript.

Key Features

Feature	Implementation
10 Responsive Pages	Each page is fully responsive from 320px to 1920px+
Zero Framework Dependencies	Pure vanilla stack — no React, Vue, or Angular
Design System	Consistent colors, typography, spacing, and component library
Form Validation	Real-time client-side validation with accessible error messaging
Scroll Animations	Intersection Observer-based reveal animations with reduced-motion support
Interactive Dashboards	Full client and admin dashboards with simulated real-time UI
Accessibility	ARIA labels, semantic HTML, keyboard navigation, focus management
Performance	Optimized WebP images, minimal HTTP requests, no build step required

Scalability

The modular file structure (per-page CSS and JS files with shared base files) allows new pages to be added without modifying existing code. The BEM-inspired naming convention prevents style conflicts. The design token system (CSS custom properties) enables theme-wide changes from a single location.

Maintainability

Each page is self-contained with its own stylesheet and script file, reducing the risk of cross-page regressions. Shared components are centralized in `shared.css` and `shared.js`. Code comments and consistent formatting ensure readability for future developers.

Future Enhancement Possibilities

◆ **Backend Integration**

Connect forms and dashboards to a REST API or CMS for dynamic content and real data persistence.

◆ **Build Tooling**

Introduce Vite or Webpack for CSS/JS minification, tree-shaking, and cache-busting in production.

◆ **Component Framework**

Migrate to a component-based framework (React, Vue, or Svelte) for dynamic routing and state management.

◆ **Testing**

Add unit tests (Jest), end-to-end tests (Playwright), and visual regression tests for quality assurance.

Appendix

Image Asset Naming Convention

Pattern	Example	Usage
{page}-hero.webp	about-hero.webp	Hero section backgrounds
{descriptive-name}.webp	court.webp, office.webp	Section-specific images
{person-name}-unsplash.webp	jonas-kakaroto-unsplash.webp	Team member portraits
logo-stackly.webp	logo-stackly.webp	Brand logo (root + images)

Coding Standards

Standard	Convention
CSS Naming	BEM-inspired: <code>.block__element--modifier</code>
JavaScript	ES6+ with IIFE scoping, <code>var</code> for older browser support where needed
HTML	Semantic elements, ARIA attributes, <code>role</code> on custom components
File Naming	kebab-case for files, matching page names (e.g., <code>practice-areas.css</code>)
Indentation	2 spaces (CSS/HTML), 2 spaces (JavaScript)
Quotes	Single quotes in JavaScript, double quotes in HTML attributes
Semicolons	Required in JavaScript, omitted in CSS

Best Practices

◆ Performance

Use WebP format for all images. Implement lazy loading with `loading="lazy"` on non-critical images. Minimize DOM depth.

◆ Security

Never embed API keys or secrets in frontend code. Use `rel="noopener"` on external links. Validate all form inputs client-side and server-side.

◆ Accessibility

◆ Version Control

Test with screen readers (NVDA, VoiceOver). Ensure all images have descriptive alt text. Maintain logical tab order throughout.

Commit atomic changes with descriptive messages. Use feature branches for new development. Review all changes before merging to main.
